PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in MERN Stack development, AI-powered web applications, REST APIs, and Data Structures & Algorithms. Passionate about building scalable full-stack applications using React, Node.js, Express.js, MongoDB, and modern AI integrations.

PROJECTS

AI-Powered Software Project Management & Client Portal

React.js — Node.js — Express.js — MongoDB

- Built a project, milestone, and task management system with role-based authentication and a dedicated client portal.
- Integrated AI-powered task generation, project summaries, and risk detection to flag potential delays.

AI-Chat-App

React.js — Node.js — Express.js — MongoDB — Google Gemini API

- Built a full-stack real-time AI chat application using the MERN stack, featuring a responsive chat interface and secure user authentication.
- Integrated the Google Gemini API using a personal Gemini API key to generate intelligent, context-aware conversational responses.

AI-Powered Real Estate Marketplace

React.js — Node.js — Express.js — MongoDB — Google Gemini API

- Built a full-stack real estate marketplace with property listings, advanced search, filters, wishlist, comparison, and buyer-seller communication.
- Integrated AI-powered property recommendations, natural-language property search, price analysis, investment insights, and property risk/anomaly detection.

SMART INDIA HACKATHON

Smart India Hackathon 2024 — Problem Statement: Fitness App

September 2024

- Collaborated with a team to design and prototype core features such as workout tracking and personalized fitness plans.
- Applied MERN stack and problem-solving skills to build a working solution under hackathon time constraints.

EDUCATION

Bachelor of Technology in Computer Science and Engineering
